JOB DESCRIPTION

POSITION TITLE: FRV-X
BUSINESS UNIT: FRV-X Mexico
LOCATION: Mexico City (availability to travel within country)
REPORTS TO: FRV-X Mexico Manager

OVERVIEW:

Leading global operator specialised in the energy transition is looking for a Junior Engineer for its FRV-X Unit that looks for new energy business models (storage, Hydrogen, amongst others). This role will support the expansion of FRV in these kind of projects within Mexico.

RESPONSIBILITIES:

As part of the FRV-X México this position will be accountable for the following tasks:

- Support in the origination of commercial opportunities for the implementation of Battery Storage projects, and eventually in H2 and Distributed solar power generation.
- Technical design and analysis of the different projects of the FRV-X Unit.
- Negotiate with clients, constructors and suppliers.
- Support the different contract closings and execution.
- Liaise with the different internal/external stakeholders.

QUALIFICATION AND EXPERTISE:

- Bachelor's degree Electrical Engineering or similar.
- Master's degree in Renewables (highly valued).
- 4 years of experience in distributed solar power generation or Renewable Energy.
- Advanced level of English, both spoken and written.

SOFT SKILLS:

- Detail and goal-oriented.
- Innovation.
- Leadership.
- Negotiation.
- Team spirit.

IMPORTANT! FRV encourages applications from minorities, women, the disabled, and all other qualified applicants.
