JOB DESCRIPTION

POSITION TITLE: Project Development
BUSINESS UNIT: Business Development Europe
LOCATION: Madrid (Availability to travel)
REPORTS TO: Head of Project Development

OVERVIEW:

Leading global operator specialised in the complete management of solar and wind assets for the generation of electricity is looking for a Project Developer.

This role will ultimately help drive FRV's uptake of the European Renewables development division, in different European geographic markets. The successful candidate will support the department in:

- Individuating suitable renewable investment opportunities both Greenfield and Brownfield (origination)
- Following up and progressing with FRV local partners, the Greenfield projects along the critical administrative path (permitting)
- Participating to renewable tenders or programs (execution)

The candidate must be familiarized with key aspects, features and issues associated with the development of renewable projects in Europe, from inception till delivery.

RESPONSIBILITIES:

As part of the Project Development team, this position will be accountable for supporting the different stages of project development, including:

- Investment opportunities assessment, focusing on key administrative, technical, commercial and development features.
- Close interaction and follow up with FRV local partners to provide constant guidance and feedback.
- Scouting and procuring attractive Greenfield opportunities and implementing an adequate follow up of the different critical project paths to comply with internal and external timelines.
- Preparing adequate project progress reports, and presentations required for internal purposes, by properly addressing key risks associated with each project or opportunity.
- Support in the preparation of documentation required for tendering and bid processes.
- Interact with the other departments (such as finance, legal, technical, etc.) involved in project assessment or implementation.
- Working in close interaction with both internal (legal, technical and financial departments) and external (site finders, administrative, legal and technical advisers) stakeholders, involved in the development of a project.

The future happens here

QUALIFICATION AND EXPERTISE:

- Bachelor's degree in a technical field or equivalent experience required, preferably with a post-graduate level.
- +5 years of combined professional experience working (directly or indirectly) in the renewable large scale industry. Ideally the candidate will have a solid development and commercial background in large scale PV industry being involved in all relevant phases of the project life cycle.
- Deep knowledge of all key features of utility scale renewable projects
- Familiarity with permitting process and interaction with local and federal authorities and with external technical, legal and financial advisers.
- Strong verbal and written communication, presentation, and written skills.
- Project management fundamentals.
- Strong negotiating commercial and M&A skills in renewable sector.
- Experience in working with a diverse range of cultures and relationships across shareholders, colleagues, clients, and stakeholders.
- Excellent English both written and oral (other European languages will be highly valued).

SOFT SKILLS:

- Excellent communication skills
- Forward thinking
- Problem-solving
- Analytical thinking
- Proactive
- Teamwork attitude

FRV is an equal-opportunity employer. At FRV we celebrate diversity and are committed to creating an inclusive environment for all employees.

The decision to hire or discharge in this process will be based on skills and competences alignment to the role's requirements.
