JOB DESCRIPTION

POSITION TITLE:	Energy Market & Regulation Analyst
BUSINESS UNIT:	UK
LOCATION:	West London (Chiswick)
REPORTS TO:	Managing Director, UK

OVERVIEW:

Leading global operator specialised in the complete management of solar and wind assets for the generation of electricity is looking for an Energy Market & Regulation Analyst for its UK Business Unit.

RESPONSIBILITIES:

As part of the UK team and reporting to the Managing Director, this position will be accountable for the following tasks:

- Market analysis and modelling: monitor the regulatory and electricity market environment within the country.
- Regulatory assessment and support in advocacy tasks
- International development: support in screening process, prioritization, selection, and design of the market strategy entering in new countries
- Analysis of technology evolution: support in the analysis of the competitive situation of new potential technologies: research regulation and the market/cost evolution, potential growth, and geographical areas

QUALIFICATION AND EXPERTISE:

- Bachelor's degree in Engineering, Business Administration or Economics
- A post-graduate degree at Master's level or equivalent would be an advantage and a multidisciplinary background an asset
- +4 years of experience in strategy or management consulting with main focus in the Energy & Utilities industry
- Good knowledge of the energy sector including policies and regulatory aspects with relevance in the area of power and energy markets
- High proficiency with Excel and experience with databases
- Experience within renewables and/or energy efficiency projects (valued)

SOFT SKILLS:

- Strong analytical skills
- Intellectual curiosity and desire to learn new skills
- Problem-solving
- Proactive
- Team spirit
- Good communication skills
