JOB DESCRIPTION

POSITION TITLE: Asset Manager

BUSINESS UNIT: Asset Management

LOCATION: Madrid (Availability to travel)

REPORTS TO: Head of Asset Management

OVERVIEW:

Leading global operator specialising in the energy transition is looking for an Asset Manager.

The successful candidate will manage a portfolio of solar PV projects in Spain and the Middle East, overseeing the day-to-day management of the assets, including contracts, performance, compliance, budgets and relationships with third parties.

RESPONSIBILITIES:

- Organizing and completing all Asset Management activities for the assigned PV projects;
- Supervising and managing all relevant contracts (EPC Contract, Finance Agreement, O&M, PPA's, Interconnection, etc.);
- Ensure the plants comply with all applicable laws and regulations;
- Review O&M Plan, reports, processes, procedures and ensure that maintenance activities are carried out safely and effectively;
- Monitor daily performance data and KPIs, analyze deviations against targets and identify recurring equipment failures;
- Lead improvement initiatives with Operations, O&M and Energy Management to increase asset value and profitability;
- Review EPC/O&M contractor's performance calculations against contractual requirements;
- Monitor operational technical performance, analysing KPIs and deviations against targets;
- Monitor and analyze daily performance data to evaluate asset performance and identify recurring equipment failures;
- Reporting on Asset Management activities to different Stakeholders;
- Managing and maintaining relationships with main stakeholders, like authorities, utility, lenders, advisors, the community and service providers;
- Participating and leading site visits and inspections involving third parties;
- Preparing and monitoring project budgets;
- Support other FRV's departments (Development, Finance, Risks, Energy management, Construction, M&A) in corporate activities when required.

QUALIFICATION AND EXPERTISE:

- Bachelor Degree in Engineering (Industrial, Energy, Electrical, Mining or similar)
- 3+ years in asset management, at least 2 of them in large-scale renewable assets;
- Experience in working in an international environment;

- Solid understanding of electrical systems and contract management;
- Outstanding communication skills;
- Strong analytical and decision-making skills, and the ability to work autonomously.
- Practical use of AI tools;
- Proficiency in English

SOFT SKILLS:

- Analytical thinking.
- Detail oriented.
- Proactive.
- Teamwork attitude.
